

FILE ANALYSIS

Analyze, Manage & Secure your Data

Benefits for your Network

- Lifecycle Data Management
- Network Inventorying
- Data Migrations

Analysis

Understand Your Data

Report On:

File Size: How much space are certain files taking up on your network?

File Security: Make sure only the right people have access.

File Usage: Identify stale and orphaned data, along with what's important.

Quickly understand your data by analyzing millions of files across many terabytes of file storage along with the associated security and identity infrastructure.

Management

Automated & Self-Regulated

Self-regulated and automated provisioning, management, and cleanup of file storage based on policies that you define.

Define your file storage policy based on ...

Identity

Role

Schedule

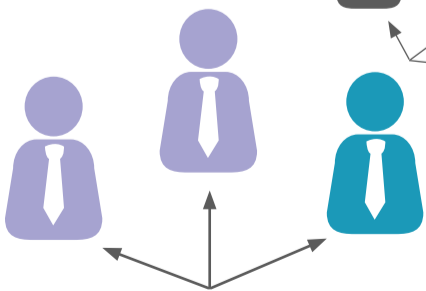

File Lifecycle

Security

Remove & Prevent

Threats to your data's security can come from anywhere...or anyone...

Comprehend what's going on from a security perspective. Remove threats and prevent them from coming back.

Get security that adapts to:

Location

Role

Group Collaboration

What's taking up space on your Network?
